Data Analyst — Junior ML Engineer — Generative AI — AI Engineer

SUMMARY

IT graduate with hands-on expertise in Data Analytics, Machine Learning, and Generative AI through end-to-end real-world projects. Proficient in Python, SQL, Power BI, FastAPI, TensorFlow, and scikit-learn, with experience in ETL pipelines, predictive modeling, REST APIs, and interactive dashboards. Strong foundation in data preprocessing, statistical analysis, model deployment, and delivering actionable business insights.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Data Analysis:** Pandas, NumPy, Excel, Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis
- **Machine Learning:** Scikit-learn, Feature Engineering, Regression, Classification, Model Evaluation
- **Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn
- **Databases:** MySQL, PostgreSQL, SQLite
- **Version Control:** Git, GitHub

EXPERIENCE

Data Analyst Intern — YBI Foundation

Dec 2024 – Jan 2025

- **Multi-domain Data Analysis & Data Mining:** Processed and wrangled 4+ complex real-world datasets using Python; automated programmatic data handling routines, feature parsing, and standard schema preparation to output production-ready matrices for downstream modeling.
- **Model Deployment & BI Reporting:** Implemented 3+ algorithmic models (regression, classification, clustering) to uncover key historical patterns; built 5+ comprehensive visualization dashboards across Power BI and Tableau; automated internal ETL pipelines cutting manual preparation and reporting intervals by ~40%.

PROJECTS

Mental Health Score Prediction App (MindPulse) • [GitHub](#) • [Live Demo](#)

- **End-to-End ML Pipeline:** Engineered a production-ready web platform executing runtime statistical health indexing using an optimized Scikit-learn regression model serialized via Joblib.
- **FastAPI REST Backend:** Programmed a structured REST API layer with rigorous Pydantic schema validation and cross-origin CORS handling; built an asynchronous frontend parsing strict JSON payloads natively.

Interactive AI Personality Chatbot • [GitHub](#) • [Live Demo](#)

- **Stateful Persona Management:** Developed a modular LLM interface hosting isolated agent temperaments using Streamlit session state memory architectures to manage dynamic conversation contexts.
- **LangChain Orchestration:** Built declarative context prompts routed rapidly using the Groq API framework, scaling fast generation parameters with secure environment variable loading patterns.

Consumer Purchasing Behavior & Sales Analytics • [GitHub](#)

- **Exploratory Data Analysis (EDA):** Conducted deep data exploration on retail transactional databases via Pandas, NumPy, and Seaborn to track shopping velocities and segment target age cohorts.
- **Schema Sanitization & Reporting:** Executed thorough data sanitization routines alongside custom relational SQL queries; delivered a comprehensive reporting profile backed by strategic growth recommendations.

Football Performance Analytics • [GitHub](#)

- **End-to-End Data Analytics Pipeline:** Built an automated ETL pipeline to collect live football data from the Football-Data.org REST API, transform raw JSON using Python and Pandas, and load curated datasets into MySQL for analysis.
- **SQL Analytics & Power BI Dashboard:** Performed analytical SQL using joins, CTEs, and window functions to derive KPIs and developed interactive Power BI dashboards to analyze team performance, league trends, and key business insights.

CERTIFICATIONS

- **Data Analytics Virtual Experience – TATA Group (via Forage)** — Covered: Predictive Analytics, AI Governance Frameworks, and Exploratory Data Analysis.
- **Micro1 AI Interview Certification – Outstanding Performance** — Recognized for outstanding performance in AI-powered technical interviews, demonstrating strong problem-solving, analytical thinking, and technical proficiency.
