Data Analyst — Machine Learning — Python — SQL — Power BI

SUMMARY

IT graduate with hands-on experience in Data Analytics, Machine Learning, and Generative AI through end-to-end projects. Proficient in Python, SQL, Power BI, MySQL, and Scikit-learn for ETL, data analysis, dashboard development, and predictive modeling. Passionate about transforming data into actionable business insights.

TECHNICAL SKILLS

- **Programming:** Python, SQL
- **Data Analysis:** Pandas, NumPy, Excel, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis
- **Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn
- **Databases:** MySQL, PostgreSQL, SQLite, SQL Server
- **Machine Learning:** Scikit-learn, Regression, Classification, Clustering, Feature Engineering, Model Evaluation, NLP, Sentiment Analysis
- **Frameworks:** FastAPI, Streamlit, LangChain
- **Tools:** Git, GitHub, Jupyter Notebook, VS Code

EXPERIENCE

Data Analyst Intern **Dec 2024 – May 2025**

YBI Foundation

- Cleaned, transformed, and analyzed 4+ real-world datasets using Python (Pandas and NumPy), performing data preprocessing and feature engineering to prepare high-quality datasets for machine learning.
- Conducted exploratory data analysis (EDA) to identify trends and patterns, and developed regression, classification, and clustering models using Scikit-learn.
- Built 5+ interactive dashboards in Power BI and Tableau to visualize key insights and support data-driven decision-making.
- Automated data preparation and ETL workflows using Python, reducing manual effort and improving reporting efficiency.

PROJECTS

Marketing Analytics & Customer Sentiment Analysis (PureCart) GitHub

- Built an end-to-end marketing analytics solution using SQL Server, Python, and Power BI to diagnose declining conversion rates and customer engagement, integrating customer, product, campaign, and marketing engagement data across a 3-year relational data model.
- Performed sentiment analysis on 1,300+ reviews using Python, NLTK, and VADER; wrote SQL queries for KPI calculation (conversion rate, CTR, AOV); and designed a 4-page Power BI dashboard to surface funnel drop-off points and drive marketing recommendations.

FMCG Supply Chain Performance & Inventory Analytics GitHub

- Developed an end-to-end supply chain analytics solution using Python, Pandas, MySQL, SQL, and Power BI by building ETL pipelines, generating realistic operational datasets, and designing a relational database for business reporting.
- Performed SQL-based KPI analysis and created interactive Power BI dashboards to monitor sales, inventory, supplier performance, logistics costs, inventory turnover, fill rate, and OTIF, enabling data-driven supply chain decision-making.

Football Performance Analytics GitHub

- Designed an end-to-end ETL pipeline to extract football match data from the Football-Data.org REST API, transform raw JSON data using Python and Pandas, and load curated datasets into MySQL.
- Performed SQL analysis using joins, CTEs, and window functions to derive KPIs, and developed interactive Power BI dashboards to analyze team performance, league trends, and match statistics.

Consumer Purchasing Behavior & Sales Analytics GitHub

- Performed exploratory data analysis (EDA) on retail transaction data using Python, Pandas, NumPy, SQL, and Seaborn to identify customer purchasing patterns and sales trends.
- Cleaned and transformed raw datasets, wrote SQL queries for analysis, and created visual reports highlighting customer segments, purchasing behavior, and business growth opportunities.

Mental Health Score Prediction App (MindPulse) GitHub Live Demo

- Built an end-to-end machine learning application using Python, Scikit-learn, FastAPI, and Joblib to predict mental health scores from user inputs.
- Developed REST APIs with Pydantic validation, integrated an interactive frontend, and deployed the application for real-time predictions.

CERTIFICATIONS

- Tata Group (Forage) – Data Analytics Virtual Experience
- Micro1 – AI Interview Certification (Outstanding Performance)
- HackerRank – SQL (5-Star Badge)
