Harshal Valmik Saudagar

Data Analyst / ML Engineer

+91 9699838713 harshalvalmiksaudagar2005@gmail.com Pune, India harshalgit2005 Portfolio LinkedIn

Profile

Data Analytics professional with 5+ deployed projects across Python, SQL, Power BI, and Machine Learning. Hands-on expertise in building end-to-end solutions involving data cleaning, EDA, KPI analysis, predictive modeling, dashboards, and AI applications.

Skills

Programming — SQL - SQL Server, Python - Pandas, NumPy, Matplotlib, Seaborn
Tools — Power BI, Tableau, Jupyter Notebook, MS Excel, Jira, Confluence, Hive, Hadoop, Google BigQuery
Financial & Investment Analytics — Revenue Forecasting, Risk Analysis, Portfolio Performance Evaluation
Key Competencies — EDA, ETL, Budget Planning, Risk Management, Stakeholder Management, Leadership, Problem Solving

Education

B.E. in Information Technology 2022 – 2026
SKN Sinhgad Institute of Technology and Science, Pune — 7.55 CGPA — A+

Experience

Data Analytics Intern, YBI Foundation Dec 2024 – May 2025
Remote

- Cleaned, transformed, and analyzed 4+ real-world datasets using Python, Pandas, and NumPy, applying data preprocessing and feature engineering techniques to prepare datasets for machine learning.
- Conducted exploratory data analysis (EDA) to identify trends and patterns, and developed regression, classification, and clustering models using Scikit-learn.
- Built 5+ interactive dashboards in Power BI and Tableau to visualize KPIs and analytical insights, supporting data-driven decision-making.
- Automated data preparation and ETL workflows using Python, reducing manual effort and improving reporting efficiency.

Projects

Marketing Analytics & Customer Sentiment Analysis – PureCart

- Built an end-to-end marketing analytics solution using SQL Server, Python, and Power BI to analyze conversion rates, customer engagement, campaigns, and product performance across a 3-year relational data model.
- Performed sentiment analysis on 1,300+ customer reviews using NLTK and VADER, calculated KPIs including conversion rate, CTR, and AOV, and developed a 4-page Power BI dashboard to identify funnel drop-offs and generate marketing insights.

FMCG Supply Chain Performance & Inventory Analytics

- Developed an end-to-end supply chain analytics solution using Python, Pandas, MySQL, SQL, and Power BI, including ETL pipelines, operational data generation, and relational database design.
- Performed SQL-based KPI analysis and built interactive Power BI dashboards to monitor sales, inventory, supplier performance, logistics costs, inventory turnover, fill rate, and OTIF.

Football Performance Analytics

- Designed an end-to-end ETL pipeline using the Football-Data.org REST API, Python, and Pandas to extract, transform, and load curated football match data into MySQL.
- Applied SQL joins, CTEs, and window functions to derive performance KPIs and developed interactive Power BI dashboards to analyze team performance, league trends, and match statistics.

MindPulse – ML Mental Health Score Prediction App — Live Demo

- Built an end-to-end machine learning application using Python, Scikit-learn, FastAPI, and Joblib to predict mental health scores from user inputs.
- Developed REST APIs with Pydantic validation, integrated an interactive frontend, and deployed the application for real-time predictions.

CERTIFICATIONS

• Tata Group (Forage) — Data Analytics Virtual Experience • Micro1 — AI Interview Certification (Outstanding Performance) • HackerRank — SQL (5-Star Badge)
