Data Analyst — Junior ML Engineer — Generative AI — AI Engineer

PROFESSIONAL SUMMARY

IT graduate with 2+ years of hands-on experience in data analytics, AI model training, and generative AI application development. Successfully engineered full-stack machine learning applications, production-ready RAG architectures, and interactive analytics dashboards. Proficient in pipeline automation, statistical modeling, data preprocessing, and REST API implementation. Adept at translating complex datasets into actionable operational intelligence.

TECHNICAL SKILLS

- **Languages & Database:** Python (Pandas, NumPy), SQL (MySQL, PostgreSQL), HTML5, CSS3, JavaScript
- **Machine Learning & AI:** Scikit-learn, FastAPI, LangChain, Groq API, Pydantic, REST APIs, JSON Validation
- **Data Management & ETL:** Data Cleaning, Preprocessing, Feature Engineering, Feature Scaling, Pipeline Automation
- **Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn, Dashboard Design, Exploratory Data Analysis (EDA)
- **DevOps & Tools:** Git, GitHub, Version Control, Render Deployment, Cloud Services, Jupyter Notebook, Joblib

PROFESSIONAL EXPERIENCE

Data Analyst Intern — YBI Foundation

Dec 2024 – Jan 2025

- **Multi-domain Data Analysis & Data Mining:** Processed and wrangled 4+ complex real-world datasets using Python; automated programmatic data handling routines, feature parsing, and standard schema preparation to output production-ready matrices for downstream modeling.
- **Model Deployment & BI Reporting:** Implemented 3+ algorithmic models (regression, classification, clustering) to uncover key historical patterns; built 5+ comprehensive visualization dashboards across Power BI and Tableau; automated internal ETL pipelines cutting manual preparation and reporting intervals by ~40%.

PROJECTS

Mental Health Score Prediction App (MindPulse) • [GitHub](#) • [Live Demo](#)

- **End-to-End ML Pipeline:** Engineered a production-ready web platform executing runtime statistical health indexing using an optimized Scikit-learn regression model serialized via Joblib.
- **FastAPI REST Backend:** Programmed a structured REST API layer with rigorous Pydantic schema validation and cross-origin CORS handling; built an asynchronous frontend parsing strict JSON payloads natively.

Interactive AI Personality Chatbot • [GitHub](#) • [Live Demo](#)

- **Stateful Persona Management:** Developed a modular LLM interface hosting isolated agent temperaments using Streamlit session state memory architectures to manage dynamic conversation contexts.
- **LangChain Orchestration:** Built declarative context prompts routed rapidly using the Groq API framework, scaling fast generation parameters with secure environment variable loading patterns.

Consumer Purchasing Behavior & Sales Analytics • [GitHub](#)

- **Exploratory Data Analysis (EDA):** Conducted deep data exploration on retail transactional databases via Pandas, NumPy, and Seaborn to track shopping velocities and segment target age cohorts.
- **Schema Sanitization & Reporting:** Executed thorough data sanitization routines alongside custom relational SQL queries; delivered a comprehensive reporting profile backed by strategic growth recommendations.

CERTIFICATIONS

- **Data Analytics Virtual Experience – TATA Group (via Forage)** — Covered: Predictive Analytics, AI Governance Frameworks, and Exploratory Data Analysis.
- **Generative AI Certification – In Progress** — Structural training on LLM tuning, custom prompt engineering pipelines, and autonomous agent orchestration.
