Harshal Valmik Saudagar

Data Analyst / ML Engineer

+91 9699838713 harshalvalmiksaudagar2005@gmail.com Pune, India harshalgit2005 Portfolio LinkedIn

Profile

Information Technology graduate and Data Analytics professional with a proven track record of deploying end-to-end data pipelines, ETL workflows, and interactive business intelligence dashboards. Skilled in translating complex relational datasets into structured KPIs using SQL, Python, and Power BI to support data-driven decision-making.

Skills

Programming — SQL - SQL Server, Python - Pandas, NumPy, Matplotlib, Seaborn
Tools — Power BI, Tableau, Jupyter Notebook, Jira, Confluence, Hive, Hadoop, Google BigQuery
Spreadsheets — MS Excel
Financial & Investment Analytics — Revenue Forecasting, Risk Analysis, Portfolio Performance Evaluation
Key Competencies — EDA, ETL, Budget Planning, Risk Management

Education

B.E. in Information Technology 2022 – 2026
SKN Sinhgad Institute of Technology and Science, Pune — 7.55 CGPA — A+

Experience

Data Analytics Intern, YBI Foundation Dec 2024 – May 2025
Remote

- Engineered automated data preprocessing and feature engineering pipelines for 4+ datasets using Pandas and NumPy, reducing data anomalies and improving downstream model accuracy.
- Conducted exploratory data analysis (EDA) to uncover trends and patterns; designed predictive regression and classification models using Scikit-learn.
- Designed and launched 5+ interactive Power BI and Tableau dashboards to track cross-functional KPIs, accelerating reporting loops for stakeholders.
- Automated data preparation and ETL workflows using Python, reducing manual effort and improving reporting efficiency.

Projects

Loan Default Risk Dashboard – BFSI Credit Risk Analytics

- Built an end-to-end credit-risk analytics pipeline on a synthetic lending dataset (20,000 customers, 24,000 loans) using Python, SQLite, and SQL for data quality checks, feature engineering, and borrower segmentation.
- Calculated segment-level default rates using a 6-month seasoning rule and smoothed probability of default, and built a Power BI dashboard with DAX measures that routes 727 pending applications into Manual Review, Standard, or Fast-Track.

Marketing Analytics & Customer Sentiment Analysis – PureCart

- Built an end-to-end marketing analytics solution using SQL Server, Python, and Power BI to analyze conversion rates, customer engagement, campaigns, and product performance across a 3-year relational data model.
- Performed sentiment analysis on 1,300+ customer reviews using NLTK and VADER, calculated KPIs including conversion rate, CTR, and AOV, and developed a 4-page Power BI dashboard to identify funnel drop-offs and generate marketing insights.

FMCG Supply Chain Performance & Inventory Analytics

- Developed an end-to-end supply chain analytics solution using Python, Pandas, MySQL, SQL, and Power BI, including ETL pipelines, relational database design, and simulated synthetic operational log data to build out structural database designs, validating SQL joins and CTE performance.
- Performed SQL-based KPI analysis and built interactive Power BI dashboards to monitor sales, inventory, supplier performance, logistics costs, inventory turnover, fill rate, and OTIF.

Football Performance Analytics

- Designed an end-to-end ETL pipeline using the Football-Data.org REST API, Python, and Pandas to extract, transform, and load curated football match data into MySQL.
- Applied SQL joins, CTEs, and window functions to derive performance KPIs and developed interactive Power BI dashboards to analyze team performance, league trends, and match statistics.

MindPulse – ML Mental Health Score Prediction App — **Live Demo**

- Built an end-to-end machine learning application using Python, Scikit-learn, FastAPI, and Joblib to predict mental health scores from user inputs.
- Developed REST APIs with Pydantic validation, integrated an interactive frontend, and deployed the application for real-time predictions.

CERTIFICATIONS

• Tata Group (Forage) — Data Analytics Virtual Experience • Micro1 — AI Interview Certification (Outstanding Performance) • HackerRank — SQL (5-Star Badge)
